

# Android Studio Setup

These procedures should help you through initial installation on your computer:

## Android Studio

<http://developer.android.com/sdk/installing/studio.html>

---

## Android Studio Install

1. Download the current recommended stable version by [deltaprogram.us](http://deltaprogram.us) by clicking the link below for your operating system:

### Windows:

<http://dl.google.com/dl/android/studio/ide-zips/0.4.6/android-studio-ide-133.1028713-windows.zip>  
(159 MB)

### Mac:

<http://dl.google.com/dl/android/studio/ide-zips/0.4.6/android-studio-ide-133.1028713-mac.zip>  
(158 MB)

### Linux:

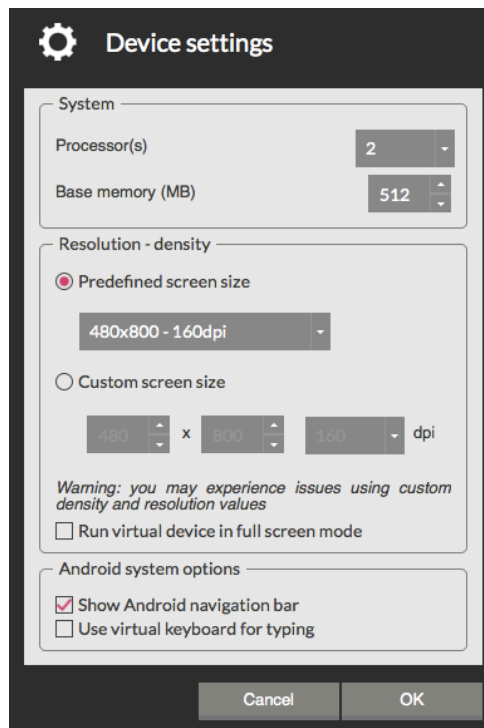

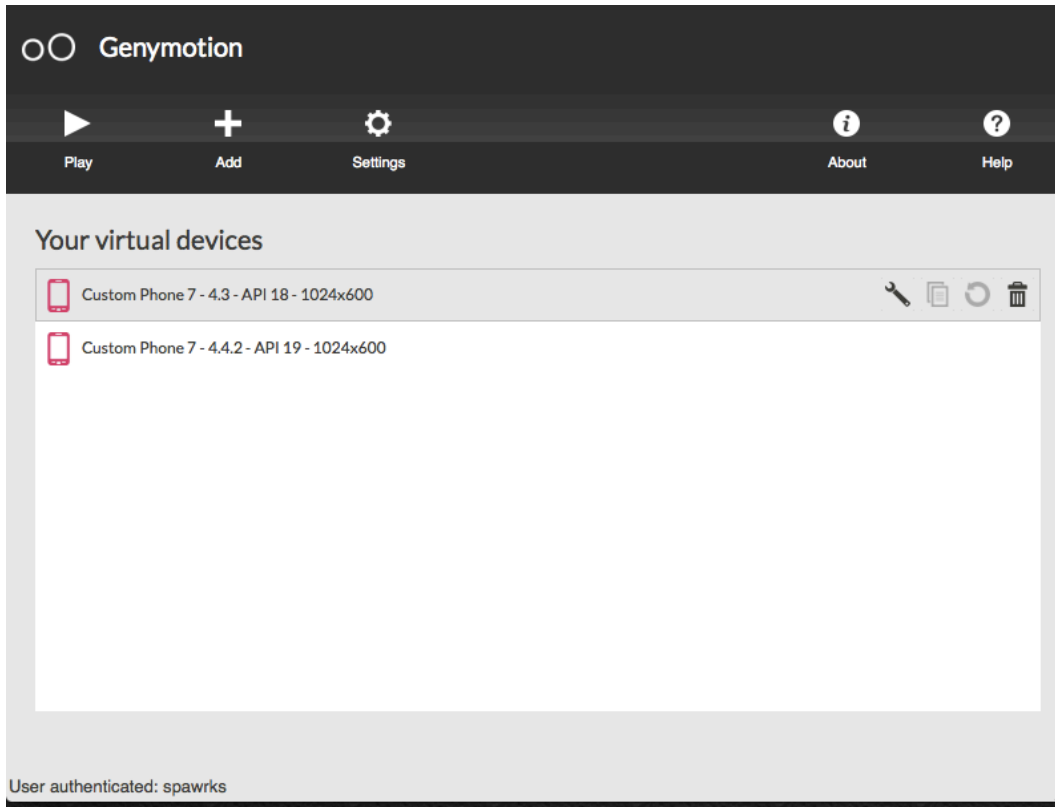

<http://dl.google.com/dl/android/studio/ide-zips/0.4.6/android-studio-ide-133.1028713-linux.zip>  
(157 MB)

2. Unzip the file by clicking on it and move it to the appropriate folder. For OSX this is /Applications
3. Click to run, and enjoy your new powerful tool!

---

## Genymotion Install:

1. Visit <http://www.genymotion.com/> and follow the links for getting the “free” version of Genymotion
2. Setup a new account and download Genymotion
3. Click “ADD” and download the following devices:
  - Custom Phone 7 - 4.3 API 18 1024x600
  - Custom Phone 7 - 4.4.2 API 19 1024x600
4. Click the wrench next to “Custom Phone 7 - 4.3 API 18 1024x600” and set “Preferred Screen Size” to 480x800 - 160dpi
5. Enjoy !

---

## Building Your First App

1. Open DeltaBartalk.zip from supporting materials
2. Open the project, and run the project
3. Use your first app to impress your friends!
